**MOTO™ H390**

[motorola.ca/H390](http://motorola.ca/H390)

**HELLOMOTO™**

The MOTO H390's features work together to create uncluttered simplicity and a streamlined wireless experience. Enjoy increased talk time—with approximately 8 hours between charges—along with essential functionality and ease-of-use. Dedicated on/off and call buttons get you talking with just one press of a button, and convenient mute and volume controls are within easy reach.

Motorola's expertise in *Bluetooth*-enabled headsets plus intensive research in ergonomics combine to create TrueComfort™ design. The best speaker, ear cushion and ear hook designs we've created to date. Enjoy unrivaled fit and the audio quality that comes with closer placement to your ear.

### Extended talk

With approximately 8 hours of hands-free talk time, you'll spend more time chatting and less time charging. Check the battery level indicator to know when it's time to recharge so you can have power when you need it.

### Convenient wireless

Crisp sound and convenient features come together for a well-rounded hands-free experience. Dedicated on/off and call buttons get you connected with one touch to a compatible phone, and volume controls are right at your fingertips. You don't have to be a techie to go wireless.

### Supreme comfort

Fits so well, you'll hardly realize you're wearing a headset. TrueComfort design helps the H390 conform to the surface of your ear with multiple ear cushions for a superb fit and a discreet, flexible ear hook that holds the headset securely in place.

### Simple start

Motorola's exclusive EasyPair technology makes initial setup as trouble-free as turning the headset on. It simplifies how you connect with your compatible *Bluetooth*-enabled phone. Just turn the H390 headset on, and it will automatically start the connection with the phone.
