The H690 is for existing Bluetooth® enabled headset users who are looking for the newest technology in a practical headset. These technophiles are looking for outstanding performance combined with small size and sleek design.

FAQs

How does dual microphone noise cancellation work?

Dual microphone noise cancellation reduces background noise, elevating the voice for clear conversations. The second microphone picks up the environmental sounds, which are then reduced so your voice is clear.

What is Motorola's exclusive TrueComfort™ design?

TrueComfort™ is the result of an intensive data-driven measurement study of the human ear. The new ear hook and molded speaker design are based on laser-accurate global measurements. Multiple ear bud cushion options help customize fit.
